RE: Major Field Assessment Report 2003-2005 and Planning 2005-2007 – Physics Ed.

---

No major field assessment was possible for the physics education curriculum for this reporting period (Academic Years 2003-2004, 2004-2005) due to the fact that there were no graduates under the physics education curriculum during this period. No changes will be made to the assessment instrument for the next reporting period (2005-2007).
