Executive Summary

In the Spring of 2002, the Office of Institutional Research and Assessment sent a survey to a random sample of currently enrolled Southeastern students. Along with obtaining demographics on the student body not readily found in the Student Record System, the intent of the survey was to gather information on the opinions of students regarding student-centered activities, services, and programs in order to evaluate their visibility and effectiveness. The survey was mailed to 653 randomly selected students who reflected Southeastern's student population as stratified by sex, class (freshman, sophomore, junior, senior, and graduate students), race (white or minority), and whether they live on or off campus. The return rate of the survey after two "reminder" mailings was 25% (n=158).

The survey was developed by representatives from the Student Government Association (SGA), along with the staff from the Office of Institutional Research and Assessment. The survey addressed five topic areas:

- ! **Office of Technology.** Students indicated they are most satisfied with LEONet and most frequently use the world wide web while on campus. Almost all students use electronic forms of communication like e-mail.
- ! **Sims Memorial Library.** Most students had physically gone to the library during the semester. Traditional students are more likely than non-traditional students to go to the library
- ! **Student Government Association.** Lack of knowledge appears to be the greatest problem; the overall majority of students do not know which Senators represent their college, and most do not know any SGA member.
- ! **Student Activities and Student Life.** Students rated services for students with disabilities as the most important service offered on campus, and Recreational Sports and Wellness was the one they are most satisfied with. The Lion's Roar had the highest level of usage. Students spend over 30 hours per week working and an additional 30 hours interacting with their families.
- ! **Academic Services.** Students were most satisfied with the catalogue information they received prior to enrolling. Overall, the respondents felt the class schedule was the most informative web page and the easiest to find. In general, students thought the Academic Services staff were friendly, helpful and knowledgeable.
- ! **Your Family and Job.** Most of Southeastern's students are single, traditional students who travel more than 30 miles (one way) to school, and hold a job off campus.

Method

Participants

A total of 653 surveys were sent to a randomly selected sample of students who were enrolled at Southeastern in the Spring of 2002. The students were stratified by sex, class (freshmen, sophomore, junior, senior and graduate student), race (white or minority), and whether they lived on campus or off campus. The sample mirrored the student body on these characteristics.

Of the 653 surveys distributed, 12 were returned as non-deliverable. Of the 641 remaining surveys, 158 were completed and returned for a response rate of 25%. Analysis of the variables of stratification revealed that there were differences between the returned and non-returned surveys in sex and class. A significantly larger proportion of females returned the survey than did males ($\chi^2(1)=5.27$ $p<.05$). A significantly larger proportion of Juniors returned the survey than expected, and significantly smaller proportion of Freshmen did not return the survey than expected ($\chi^2(4)=25.57$ $p<.05$).

Of the 177 returned surveys, 72% ($n=113$) were female and 28% ($n=44$) were male. The vast majority (83%, $n=130$) were White, Non-Hispanic, while 13% ($n=20$) were Black Non-Hispanic, and 4% ($n=6$) were other minorities. The average age of respondents was 26.02. Nineteen percent ($n=29$) were freshmen, 19% ($n=29$) were sophomores, 23% ($n=36$) were juniors, 28% ($n=44$) were seniors, and 12% ($n=19$) were graduate students. The majority of the respondents were in the College of Education & Human Development (27%, $n=42$), while 22% ($n=34$) were in the College of Arts & Sciences, 20% ($n=32$) were in the College of Business & Technology, 22% ($n=34$) were in the College of Basic Studies, 10% ($n=15$) were in the College of Nursing & Health Sciences. The following figures provide a comparison of the population to the respondents.

Gender and Race for Spring 2002 Enrollees and Respondents

Procedure

The survey was mailed to students in March 2002. Included with the survey was a business reply envelope and an incentive for completing the survey. Ten days later, a post card reminder was mailed to students who had not responded. Ten days following the mailing of the post cards, a second survey was mailed to all students who had not yet responded.

Instrument

The survey was developed in conjunction with representatives from the Student Government Association (SGA), Student Affairs and staff from the Office of Institutional Research and Assessment. The five areas addressed in the survey were:

- ! Section 1 - Technology. Questions centered on student satisfaction with student computing and student use of technology.
- ! Section 2 - Sims Memorial Library. Questions centered on student use of the library and satisfaction with hours.
- ! Section 3 - Student Government Association (SGA). This section addressed students' perception of the SGA.
- ! Section 4 - Student Activities and Student Life. This section addressed student satisfaction and use of student services, program, activities, and offices. As well as how student's spend their time, campus involvement, and general student perceptions.
- ! Section 5 - Controller's Office. Students rated their satisfaction with the Controller's Office and paying tuition on the web.
- ! Section 6 - Academic Services. Students rated their satisfaction with various aspects of Records & Registration and Admissions & Financial Aid.
- ! Section 7 - Your Family and Job. Demographic information that is not readily available through the Student Record System was included in this section.

Results

Technology

Students were asked to express their satisfaction with the use of technology in classroom teaching, as well as computer hardware, software, and instruction available on campus. They were also asked to express their satisfaction with computer lab locations, help available to answer technology questions, the use of the Technology fee to improve the technical environment at Southeastern, and the use of LEONet. Overall, students are most satisfied with the Student Registration System (LEONet) (mean=4.05) and are least satisfied with the amount of help available to answer technology questions (mean=3.36). Tables 1-8 provide information on all participants' satisfaction with technology at Southeastern, as well as breakdowns by appropriate demographics.

The second question in the Office of Technology section asked respondents to indicate how often they use computing services on campus, including word processing, multimedia (CD-ROM), world wide web, e-mail, spreadsheets, and the Student Administration System (LEONet). Overall students indicated they use the world wide web most frequently (mean=3.90) and spreadsheets least frequently (mean=2.23). Tables 9-14 provide information on all participants' level of use on campus, as well as breakdowns by appropriate demographics.

The next question in Section 1 asked students how often they used electronic forms of communication like e-mail. The majority of students indicated that they use electronic communication, with 50.0% using it often and 44.5% using it sometimes. Table 15 provides information on all participants' level of use as well as breakdowns by appropriate demographics.

Sims Memorial Library

The first question asked whether respondents had physically gone to the library during the semester. Almost 80% of the respondents had physically gone to the library. Traditional students were more likely to have done so than non-traditional students. The majority of students were satisfied with the current library hours. If any changes were to be made in the hours, students would prefer more weekend hours. Table 18 provides information on how often participants had physically gone to the library, as well as breakdowns by appropriate demographics. Table 19 provides this information for participants' opinion of library hours.

Student Government Association

This section asked for the participants' opinions on the visibility and effectiveness of the Student Government Association (SGA). More than three-quarters (83%) of participants indicated that they do not know which senators represented their college, and 84% do not know any member of the SGA. More than a third (41%) indicated SGA is an asset to Southeastern, and 24% indicated they frequently hear about the SGA. In general, minority students indicated a stronger agreement with the statements than did White, non-Hispanic students. Tables 20-28 provide all participants' agreement with each statement as well as demographic breakdowns.

Student Activities and Student Life

The first part of section 3 asked respondents to indicate how important they thought various student services, program, activities and offices were. In addition they were asked to indicate whether they were aware of the service, if so, if they had used the service, and if they had used the service, how satisfied they were with the service. Overall, respondents thought services for students with disabilities was the most important service (mean=4.6) and Greek Affairs was the least important (mean=3.1). In terms of awareness of the various services, Campus Judicial Services had the highest level of respondents being unaware of the service (47%). Veteran Student Services had the lowest percentage of usage (8%) while the Lion’s Roar had the highest percentage of usage (76%). Of those students who have used the service, Recreational Sports and Wellness had the highest level of satisfaction (mean=4.4) and Greek Affairs had the lowest level of satisfaction (mean=3.2). Tables 29-62 provide overall results for each item as well as demographic breakdowns.

It is also important to look at the discrepancy between the importance of a service and the satisfaction with the service. If a service is rated as very important, but satisfaction is very low, this indicates an area which needs to be addressed. Table 63 provides the mean difference between ratings of importance and ratings of satisfaction with each service, program, or activity. Students who responded “Haven’t Used” or “Unaware” for a service were not included in this analysis. The possible range is -4 to +4, with a negative number indicating a higher perceived importance than satisfaction. A positive number indicates that satisfaction is higher than importance. For example, if a student rated a service as Very Important (5) and rated satisfaction as Very Dissatisfied (1) than the difference rating would be -4.

Students were then asked to indicate how much time they spend in various activities during the week. Most students spend the most time (over 31 hours a week) either at work or caring for and interacting with their families. Figure 3 illustrates a “typical student week”.

Leisure activities include socializing with friends, watching TV, exercising/sports and recreational computer use. Tables 64-75 provide overall results for each item, as well as demographic breakdowns.

This section asked students to indicate their level of agreement with each of the statements about their experiences at Southeastern. The item rated the lowest overall was “I know a staff member with whom I would feel comfortable discussing a personal problem” (mean=2.81) followed by “I would like to take a course that has community services as a learning component” (mean=2.86). The highest rated item was “I have experienced intellectual growth at Southeastern” (mean=4.30). The next highest rated item was “I have made new friends on campus” (mean=4.22). Tables 76-105 provide information on all participants’ agreement with each item as well as demographic breakdowns.

The next question asked respondents how often during the current academic year, they had attended a variety of campus events and activities. Overall, respondents were most likely to have attended concerts (38%) and least likely to have attended films that were not required for a class (15%). Tables 106-115 provide information on all participants' attendance at each event/activity as well as demographic breakdowns.

The next section asked respondents a series of questions about the Student Activity Center. About 46% of the respondents indicated that they have used the Student Activity Center. Those who have not used it indicated that personal time constraints was the main reason for not using it. When asked what else they would like to see at the Student Activity Center, 42% of the respondents indicated a pool and 37% indicated short term child care. About two thirds of the respondents indicated they are satisfied with the Student Activity Center.

Controller's Office

This section asked respondents about their satisfaction with various aspects of the Controller's Office as well as their experience with paying for tuition by credit card over the web. Students were most satisfied with the convenience of paying for tuition and fees (mean=3.60) and least satisfied with the answers to questions when they call the Controller's Office. Less than 13% of the respondents paid their tuition via credit card on the web. The majority of those who did thought it was somewhat or very easy to use. Tables 121-128 provide overall results for each item as well as demographic breakdowns.

Academic Services

The next section of the survey asked about various functions in Academic Services. The first set of questions asked about their experiences while still in high school. An application was most likely to be available, but very few students reported available information on CLEP Testing or Departmental Credit Exams. Over 70% of the respondents indicated that Admissions or Financial Aid staff did not visit their high school. However, the majority of those who did have someone visit felt the staff was knowledgeable and helpful.

The next question asked about satisfaction with the quantity and quality of information respondents might have received from Southeastern prior to enrolling. Overall, students were most satisfied with the catalogue information. The majority of respondents indicated they did not receive any information on CLEP Testing. Tables 132-151 provide summary data on information received as well as demographic breakdowns.

The next two questions asked about early registration for the next semester. The majority of respondents (82%) indicated they did early register. Graduate students were less likely to early register. For those students who did not early register, the main reason given was they were graduating. Tables 170 and 171 provide summary data as well as demographic breakdowns.

This section asked students to indicate their level of agreement with statements made about Academic Services, including Records & Registration, Admissions, Financial Aid, Orientation, and Testing. In general, students find the Academic Services staff friendly, helpful and knowledgeable, rating the Orientation staff friendlier and more knowledgeable than the Records & Registration, Admissions, and Financial Aid staff. Respondents also indicate that PC/Terminal-based registration is slightly more convenient and easy to use than Voice Access. In general, students think the catalogue provides the information they need. Tables 173-191 provide the participants' overall agreement with each of the items, as well as demographic breakdowns.

Student Characteristics

The majority of respondents were single (n=97, 62%), while 24% (n=37) were married, and 7% (n=11) were previously married. Also, the majority of students had no children (n=106, 68%), while 17% (n=26) had one child, 5% (n=7) had two children, 3% (n=5) had three children and 1% (n=1) had four or more children.

Traditional college students are often considered to be single undergraduate students with no children between the ages of 18 and 22. However, due to changing societal and economic conditions, more non-traditional students are entering into universities. Defining non-traditional undergraduate students as those students who are over the age of 22 or married or have children, 45% (n=62) of the undergraduate respondents were non-traditional students, while 55% (n=76) were traditional students.

The survey results support the notion that Southeastern has a large commuter population. The majority of respondents (31%, n=49) travel more than 30 miles (one way) to Southeastern's main campus. The breakdown for travel to campus can be found in Table 192.

Table 192
Miles traveled one way to Southeastern's main campus

Miles Traveled	Percent	Number of Respondents
Live on Campus	7%	11
Less than 5 miles	17%	27
Between 5 and 10 miles	10%	15
Between 11 and 20 miles	10%	15
Between 21 and 30 miles	17%	27
More than 30 miles	31%	49

Sixty-three percent (63%, n=99) of the respondents received financial aid during the 2001-2002 academic year. The majority of students (63%, n=98) work off campus, while 11% (n=17) work on campus, 2% (n=3) work both on and off campus, and 17% (n=26) do not work at all. Of those students who indicated they worked, 4% (n=5) work no more than 10 hours per week, 36% (n=42) work 11-20 hours per week, 23% (n=27) work 21-30 hours per week, and 37% (n=44) work more than 30 hours per week.

According to Terenzini et. al (1996), a first generation student is one who has no parent with any college or university experience. Using this definition, 30% (n=42) of our students are first generation college students. An additional 28% (n=40) have a least one parent with some college, but no degree.

Seven percent (7%, n=10) have at least one parent with an Associate degree, 17% (n=24) have at least one parent with a Bachelor's degree, and 15% (n=22) have at least one parent with a graduate or professional degree.
